- Easy to Use, Up Front Pricing
- Perfect Decoration Option for Light Weight Materials
- High Resolution Detail
- Cost Effective

This Embroidery logo shows bunching and the letters are not crisp and clear.

This Color Fuse Logo shows crisp, clear text and has a streamline appearance.

WASH TEST

PRE-WASH You will have a full-color, vibrant decoration which is properly fused into your apparel. With this digital process, we can ensure a crisp, clean, and very detailed print, as opposed to other boring traditional methods. Your design is contour cut to shape and is applied perfectly clean leaving a presentable appearance.

POST-WASH This garment was washed 25 times on standard washing machine hot & cold cycle using basic laundry detergent. As you can see from the pictured sample, the product is left virtually unchanged. There are no signs of color fading or deterioration, showing the durability of the Color Fuse process.

Suggested protective measures.

1. Do not use bleach in your wash.
2. Hang dry as opposed to a hot drying process.
3. Do not iron over the design.
4. Handle and store with care, do not ring out or keep coiled up for long periods of time.

Please ask your local distributor to review one of our actual test samples and take the Color Fuse Challenge.
