SUBLIMATION
ITEM 10814CP
NEOPRENE ZIPPER BOTTLE
COLLAPSIBLE

BLACK line indicates necessary bleed.
RED dashed line indicates printsafe area.
BLUE line indicates item edge.
ORANGE lines indicate recommended printing area.

GENERAL WARNINGS:

These may or may not apply to your order, but be advised:

All text smaller than 10pt Arial may not print legibly.

White or light text and artwork is affected by dot gain and must be bolded by an additional ~.5 pt for better print results.

Can not ensure anything outside of suggested imprint areas due to product shift. Image may shift from piece to piece.

COLOR ISSUES:

Can not color match for images that are not vectored. If color matching is needed, please notate requested PMS colors.

The sublimation process produces a high quality representation of your print, however **exact PMS matching cannot be guaranteed**. Every effort will be made to swatch out colors with a close tonal value.

If color matches are crucial for new AS WELL AS REPEAT PRINTS, please request a **physical sample** for approval. Colors **can and may vary** on exact repeats and during the same run.

WE DO NOT RECOMMEND USING WHITE OR ANY OTHER VERY LIGHT COLOR AS A BACKGROUND FOR SUBLIMATION.

Choosing a dark or bright color will give you the best results.

NEOPRENE ZIPPER ITEMS USE A WHITE ZIPPER-PULL THAT WILL PICK UP SUBLIMATION INK DURING THE HEAT TRANSFER PROCESS.

Proofs can be approved via email or phone.
In order to keep scheduled shipping dates,
proofs need to be approved within 24 hours.
