

Disclaimer (CUSTOMFACEMASK)

Due to this product being brand new to our facility, this product has not been officially tested. We feel certain that it will rate above the 50% percentile and possibly equal to or above the 80% percentile because we are using three layers of protection.

Our mask have three combined layers of protection. Two layers of 100% polyester fabric with one layer of Cellulose Soft Fiber Composition acting as our filter. The homemade mask shown in the illustration only has one layer of fabric and the surgical mask only has one layer of filter material.

Please note we do not have official certification on this product. Info mentioned above are our logical guess on the product

NOT INTENDED AS A MEDICAL DEVICE - Intended as a device for reducing direct hand to face contact and to limit spread of cough and sneeze emissions. This is not a medical grade mask and should not be used for that purpose.

DUST, POLLEN and PARTICLE barrier. Also a barrier for spreading saliva when coughing and sneezing. Helps to keep hands from transferring bacteria and viruses to your face while wearing. UV
